Time Guidelines

Different project types are identified and broken down into a range of estimates based on the level of difficulty. You must justify your time estimates, particularly if they are high or low. Special circumstances must be noted and a rationale provided. Not all projects will require all tasks. Do not add time for work that is not necessary. Archival collections are always unique and the recommendations in this document should be considered as starting points only.

Project Administration

IGP funds cannot be used for administrative costs, but may be eligible in grants that will be combined with the IGP. In this case, administration may not exceed 15% of the total project and cannot include IGP funding.

Scanning Projects

This assumes that all scans can be done in one pass with no digital manipulation. For other cases complete a small sample to determine reliable time estimates.

- *No Selection or Re-Housing*: 45-55 Images/Day
- *Selection but No Re-Housing*: 25-35 Images/Day
- *Selection and Re-Housing*: 20-30 Images/Day
- *Description and Other Tasks*: Follow guidelines in this document in addition to scanning timelines.

Indexing Projects

- *New Subject Authorities, Preparation/Development*: 40-50 Subjects/Day
 - It would be expected to take 20% of the total project time.
- *Transcribing Names, Developing Authority Policies*: 75-100 Names/Day
 - It would be expected to take 5% of the total project time.
